

GAURAV ADHIKARI

About Me

I specialize in ReactJS.

I have 4+ years of experience in Creating, Crafting and Developing User Interfaces.

Professional Experience

- Working as Freelancer (*Jun' 21 – present*)
- Worked as System Engineer at Tata Consultancy Services (*Jun' 18 – Jun' 21*)

Skills

- ReactJS, TypeScript, NodeJS, Redux
- HTML, CSS, JS
- Git, Jira, Unit Testing

Projects

Acknowledger App

Search Engine for Web3.0 Digital Assets.

Technology used: ReactJS, Redux

- Created pixel-perfect UI of the Client Side and Admin Dashboard from scratch from Figma Design.
- Integrated Search and Filtering of NFTs and Metaverses on the app.
- Integrated 2FA Authentication on the Client Side.
- Integrated third party APIs like OpenSea for fetching metadata and transactions in Real-Time.
- Followed Agile Methodology and used Trello for Task Management.

AB247 Auction App

Car's bidding, buying and selling platform.

Technology used: ReactJS, NodeJS

- Contributed to the project in developing new features (like Support Dashboard) of the app.
- Created reusable components and custom hooks.
- Helped in bug fixing.
- Followed Agile Methodology and used Jira for Task Management.

Crowdfund App

Secure funding platform built on blockchain.

Technology used: ReactJS, NodeJS

- Created UI of the app from scratch with mobile first approach and industry standards.
- Routed react app from NodeJS backend to secure API keys from being exposed to the web.
- Created functionality logics and integrated APIs to the application.
- Collaborated with team member to extend same code for react native android app.
- Followed Agile Methodology and used Jira for Task Management.

Morrisons

Fourth largest supermarkets chain in UK.

Technology used: ReactJS, TypeScript, GraphQL

- Created POC for new feature i.e., Retail Communications, to be added in Morrisons site.
- Introduced GraphQL to the project for faster and leaner data fetching experience.
- Using this new feature, colleague (employees of Morrisons retail) productivity improved exponentially, as previously important data was lost in silos.
- Wrote Unit Tests using Jest and React Testing Library.
