Profile Summary

Full Stack Developer with 5+ years of experience specializing in **ReactJS** and **Java Spring Boot** to build scalable, high-performance web applications. Expertise in designing and developing **microservices-based architectures**, RESTful APIs, and front-end interfaces with ReactJS. Skilled in **CI/CD automation, Agile methodologies, and cloud deployments**. Passionate about writing clean, maintainable code and improving system efficiency.

Skills

Frontend: ReactJS, HTML, CSS
Backend: Java Spring Boot, NodeJS
Databases: MySQL, PostgreSQL, MongoDB
Tools & Platforms: Git, JIRA, Agile, Docker, Jenkins, AWS, OpenShift, Jest, Junit
Programming Languages: Java, JavaScript, TypeScript

Professional Experience

DBS Bank | Hyderabad

Full-Stack Developer (June 2021 - Present)

- Developed scalable front-end applications using ReactJS, integrating them with RESTful APIs and micro services.
- Implemented backend services using Spring Boot for Action Service and Auth Service for record updates and user authentication.
- Led a team to migrate legacy Angular applications to ReactJS, enhancing security and user experience.
- Optimized Jenkins CI/CD pipelines, integrating SonarQube and NexusIQ for code quality and vulnerability assessment.
- Mentored junior developers on JavaScript and ReactJS.

Tata Consultancy Services | Gurugram

Front-End Developer (June 2019 - June 2021)

- Published npm library for reusable React components sharing across different projects.
- Developed performant REST APIs with NodeJS and Express.
- Implemented CMS for efficient data retrieval and content management on client websites.
- Utilized HTML, CSS, and JavaScript to create high-quality responsive web pages.

Education

ABES Engineering College
Bachelor of Technology
2015 - 2019
